iview HD Plus Family Package Manual

This Subscription Package is mainly for family.

When you have iview HD Plus subscription code, you can buy Sub-Device code(s) on the Second/Third Devices for your family!

With this family package, you can use our iview HD Plus as Multi-Room IPTV/Multi-Devices IPTV, Saving money and Enjoy more Family Fun!

How to use it?

Step1 Installed Plus APK on Device A(Master), install Sub-Device APK on Device B(Sub-Device/Slave)

Step2 Bind Sub-Device B to Device A by inputting subscription active code which ever been used on Device A.

Step3 Fill in 'Sub-Device Code' to the Device B, after Recharged then can watch Live Channels & VOD directly.

Manual Details as below:

Sub-Device Application:

Active Code	UserID	Type	Valid Until
e9123214143uc	1111	Master Device	2021.06.08
	2222	Sub-Device (Current Device)	2021.08.17

1. Sub-Device can only run **Sub-Device Application** and share the valid subscription of Master Device, Sub-Device doesn't have its own subscription, Sub-Device cannot recharge any active code.

2. To Use the Sub-Device, there are two steps
   a) user has to bind Sub-Device to Master Device by input any of the active code which ever been used on Master Device, after Sub-Device card has been bound successfully to the Master Device, user shall be able to see the Master Device information as above green row.
   b) user has to recharge 'Sub-Device Card' to active Sub-Device, after Sub-Device card has been recharged, the user shall be able to see the valid period of Sub-Device as above yellow row.

3. Sub-Device can only recharge 'Sub-Device Card'. 'Sub-Device Card' doesn't contain any subscription of channels. 'Sub-Device Card' can be only used to extend the valid period of Sub-Device device. There are two kinds of Sub-Device Card: 6Month and 12Month. if Master Device's subscription has expired, Sub-Device cannot watch Channel as well.

4. Sub-Device can only work in same home Network of Master Device". If Master Device and Sub-Device work from different Network, the user account will be blocked.

===

Master Application : (normal plus application)

Active Code	UserID	Type	Valid Until
912321414912c	1111	Master(Current Device)	2021.06.08
	2222	Sub-Device (STB)	2022.08.11
	3333	Sub-Device (PAD)	2020.12.23

1. One Master Device can support two Sub-Devices at maximum.
2. If Master Device is broken, user can move the subscription to a new Master Device without affect Sub-Device.

Sub-Device ID picture Sample like as bellow:
